

## Lago Vista ISD Responsible Use Guidelines for Technology

### Responsible Use Guidelines for Technology

Lago Vista Independent School District makes a variety of communications and information technologies available to students through computer/network/Internet access. These technologies, when properly used, promote educational excellence in the District by facilitating resource sharing, innovation, and communication. Illegal, unethical or inappropriate use of these technologies can have dramatic consequences, harming the District, its students, and its employees. These Responsible Use Guidelines are intended to minimize the likelihood of such harm by educating District students and setting standards, which will serve to protect the District. The District firmly believes that digital resources, information and interaction available on the computer/network/Internet far outweigh any disadvantages.

**Mandatory Review.** To educate students on proper computer/network/Internet use and conduct, students are required to review these guidelines at the beginning of each school year. All District students shall be required to acknowledge receipt and understanding of all guidelines governing use of the system and shall agree in writing to allow monitoring of their use and to comply with such guidelines. The parent or legal guardian of a student user is required to acknowledge receipt and understanding of the District's Student Responsible Use Guidelines for Technology (hereinafter referred to as the Responsible Use Guidelines) as part of their review of the Discipline Management Plan and Student Code of Conduct handbook. Employees supervising students who use the District's system must provide training emphasizing its appropriate use.

**Definition of District Technology System.** The District's computer systems and networks (system) are any configuration of hardware and software. The system includes but is not limited to the following:

- ✓ Telephones, cellular telephones, and voicemail technologies;
- ✓ Email accounts;
- ✓ Servers;
- ✓ Computer hardware and peripherals;
- ✓ Software including operating system software and application software;
- ✓ Digitized information including stored text, data files, email, digital images, and video and audio files;
- ✓ Internally or externally accessed databases, applications, or tools (Internet- or District-server based);
- ✓ District-provided Internet access;
- ✓ District-filtered public Wi-Fi; and
- ✓ New technologies, as they become available.

## Availability of Access

**Acceptable Use.** Computer/Network/Internet access will be used to enhance learning consistent with the District's educational goals. The District requires legal, ethical, and appropriate computer/network/Internet use.

**Privilege.** Access to the District's computer/network/Internet is a privilege, not a right.

**Access to Computer/Network/Internet.** Access to the District's electronic communications system, including the Internet, shall be made available to students for instructional purposes. District Wi-Fi (available for students who use District-issued mobile devices) has filtering software that blocks access to visual depictions that are obscene, pornographic, inappropriate for students, or harmful to minors, as defined by the federal CIPA. Filtered Internet access is provided to students as defined by CIPA.

**Student Access.** Computer/Network/Internet access is provided to all students for educational purposes. Student Internet access will be under the direction and guidance of a District staff member. Students may also be allowed to use the local network and public Wi-Fi with campus permission.

**Students 13 or younger.** For students under the age of 13, the Children's Online Privacy Protection Act (COPPA) requires additional parental permission for educational software tools. Parents wishing to deny access to these educational tools must do so in writing to the campus principal and Director of Technology indicating their child should be denied access to these tools. Examples of these tools, are the Google Apps Suite, wikis, blogs, Edmodo, etc.

**Use of District-Issued Mobile and Personal Telecommunication Devices.** The District believes technology is a powerful tool that enhances learning and enables students to access a vast amount of academic resources. The District's goal is to increase student access to digital tools and facilitate immediate access to technology-based information, much the way that students utilize pen and paper. To this end, the District will open a filtered, wireless network through which students in specific age groups will be able to connect District-issued telecommunication devices. Students using District-issued mobile devices or personal telecommunication devices must follow the guidelines stated in this document while on school property, attending any school-sponsored activity, or using the Lago Vista ISD network.

High School – Students are allowed to use District-issued mobile devices that can access the Internet for educational purposes as determined by the classroom teacher. Students will be allowed to use the device between classes and in the cafeteria setting in a digitally responsible manner.

Middle School – Students are allowed to use District-issued mobile devices for academic classroom use as determined by the classroom teacher and campus principal. The campus will develop procedures for use and management. Students will not be allowed to use any devices during passing periods or in the cafeteria setting.

Intermediate – Students in grades 4-5 are allowed to use District-issued mobile devices for academic classroom use as determined by the classroom teacher and campus principal. The campus will develop procedures for use and management.

Elementary – Students in grades K-3 are allowed to use District-issued mobile devices for academic classroom use as determined by the classroom teacher and campus principal. The campus will develop procedures for use and management.

**Security.** A student who gains access to any inappropriate or harmful material is expected to discontinue the access and to report the incident to the supervising staff member. Any student identified as a security risk or as having violated the Responsible Use Guidelines may be denied access to the District's system. Other consequences may also be assigned. A student who knowingly brings prohibited materials into the school's electronic environment will be subject to suspension of access and/or revocation of privileges on the District's system and will be subject to disciplinary action in accordance with the Board-approved Discipline Management Plan and Student Code of Conduct.

**Content/Third-Party Supplied Information.** Students and parents of students with access to the District's system should be aware that use of the system may provide access to other electronic communication systems in the global electronic network that may contain inaccurate and/or objectionable material.

**Subject to Monitoring.** All District computer/network/Internet usage shall not be considered confidential and is subject to monitoring by designated staff at any time to ensure appropriate use. Students should not use the computer system to send, receive, or store any information, including email messages, that they consider personal or confidential and wish to keep private. All electronic files, including email messages, transmitted through or stored in the computer system will be treated no differently than any other electronic file. The District reserves the right to access, review, copy, modify, delete, or disclose such files for any purpose. Students should treat the computer system like a shared or common file system with the expectation that electronic files, sent, received or stored anywhere in the computer system, will be available for review by any authorized representative of the District for any purpose. District-issued mobile devices and personal telecommunication devices are subject to examination in accordance with disciplinary guidelines if there is reason to believe that the Responsible Use Guidelines have been violated.

## **Student Computer/Network/Internet Responsibilities**

District students are bound by all portions of the Responsible Use Guidelines. A student who knowingly violates any portion of the Responsible Use Guidelines will be subject to suspension of access and/or revocation of privileges on the District's system and will be subject to disciplinary action in accordance with the Board-approved Discipline Management Plan and Student Code of Conduct.

**Use of Social Networking/Digital Tools.** Students may participate in District-approved social media learning environments related to curricular projects or school activities and use digital tools, such as, but not limited to, mobile devices, blogs, discussion forums, RSS feeds, podcasts, wikis, and on-line meeting sessions. The use of blogs, wikis, podcasts, and other digital tools are considered an extension of the classroom. Verbal or written language that is considered inappropriate in the classroom is also inappropriate in all uses of blogs, wikis, podcasts, and other District-approved digital tools.

**Use of System Resources.** Students are asked to purge email or outdated files on a regular basis, as well as limit personal use of hardware space on District-issued mobile devices.

**Password Confidentiality.** Students are required to maintain password confidentiality by not sharing their password with others. Students may not use another person's system account.

**Reporting Security Problem.** If knowledge of inappropriate material or a security problem on the computer/network/Internet is identified, the student should immediately notify the supervising staff member. The security problem should not be shared with others.

Students using mobile and telecommunication devices at school must adhere to the following guidelines:

- ✓ Internet access is filtered by the District on personal telecommunication devices in the same manner as District-owned equipment. If network access is needed, connection to the filtered, wireless network provided by the District is required.
- ✓ District-issued mobile devices and personal telecommunications devices are the sole responsibility of the student. The campus or District assumes no responsibility for District-issued mobile devices or personal telecommunication devices if they are lost, loaned, damaged, or stolen and only limited time or resources will be spent trying to locate stolen or lost items.
- ✓ These devices have educational and monetary value. Students are prohibited from trading or selling personal electronic equipment to other students on District property, including school buses.
- ✓ Each student is responsible for his/her own personal device: set-up, maintenance, charging, and security. Staff members will not store student owned devices at any time, nor will any District staff diagnose, repair, or work on a student's personal telecommunication device.
- ✓ Unless provided by the District, telecommunication devices will not be used as a factor in grading or assessing student work.
- ✓ Students who do not have access to personal telecommunication devices will be provided with comparable District-owned equipment or given similar assignments that do not require access to electronic devices.
- ✓ Telecommunication devices are only to be used for educational purposes at the direction of a classroom teacher or as stated for specific age groups.
- ✓ Campus administrators and staff members have the right to prohibit use of devices at certain times or during designated activities (i.e. campus presentations, theatrical performances, or guest speakers) that occur during the school day.
- ✓ An appropriately trained administrator may examine a student's personal telecommunication device and search its contents, in accordance with disciplinary guidelines.

## **Inappropriate Use**

Inappropriate use includes, but is not limited to, those uses that violate the law, that are specifically named as violations in this document, that violate the rules of network etiquette, or that hamper the integrity or security of this computer/network/Internet system or any components that are connected to it. The following actions are considered inappropriate uses, are prohibited, and will result in revocation of the student's access to the computer/network/Internet.

**Violations of Law.** Transmission of any material in violation of any federal or state law is prohibited. This includes, but is not limited to:

- ✓ Threatening, harassing, defamatory or obscene material;
- ✓ Copyrighted material;
- ✓ Plagiarized material;
- ✓ Material protected by trade secret; or
- ✓ Blog posts, Web posts, or discussion forum/replies posted to the Internet that violate federal or state law.

Tampering with or theft of components from District systems may be regarded as criminal activity under applicable state and federal laws. Any attempt to break the law through the use of a District computer/network/Internet account may result in prosecution against the offender by the proper authorities. If such an event should occur, the District will fully comply with the authorities to provide any information necessary for legal action.

**Modification of Technology.** Modifying or changing technology settings and/or internal or external configurations without appropriate permission is prohibited.

**Transmitting Confidential Information.** Students may not redistribute or forward confidential information without proper authorization. Confidential information should never be transmitted, redistributed or forwarded to outside individuals who are not expressly authorized to receive the information. Revealing personal information about oneself such as, but not limited to, home addresses, phone numbers, email addresses, birthdates or of others, is prohibited.

**Commercial Use.** Use of the system for any type of income-generating activity is prohibited. Advertising the sale of products, whether commercial or personal is prohibited.

**Marketing by Non-LVISD Organizations.** Use of the system for promoting activities or events for individuals or organizations not directly affiliated with or sanctioned by the District is prohibited.

**Vandalism/Mischief.** Any malicious attempt to harm or destroy District equipment, materials or data, or the malicious attempt to harm or destroy data of another user of the District's system, or any of the agencies or other networks to which the District has access is prohibited. Deliberate attempts to degrade or disrupt system performance are violations of District policy and administrative regulations and may constitute criminal activity under applicable state and federal laws. Such prohibited activity includes, but is not limited to, the uploading or creating of computer viruses. Vandalism as defined above is prohibited and will result in the cancellation of system use privileges. Students committing vandalism will be required to provide restitution for costs associated with system restoration and may be subject to other appropriate consequences. [See the LVISD Student Code of Conduct.]

**Intellectual Property.** Students must always respect copyrights and trademarks of third parties and their ownership claims in images, text, video and audio material, software, information and inventions. The copy, use, or transfer of others' materials without appropriate authorization is not allowed.

**Copyright Violations.** Downloading and/or using copyrighted information without following approved District procedures are prohibited.

**Plagiarism.** Fraudulently altering or copying documents or files authored by another individual is prohibited.

**Impersonation.** Attempts to log on to the computer/network/Internet impersonating a system administrator or District employee, student, or individual other than oneself, will result in revocation of the student's access to computer/network/Internet.

**Illegally Accessing or Hacking Violations.** Intentional or unauthorized access or attempted access of any portion of the District's computer systems, networks, or private databases to view, obtain, manipulate, or transmit information, programs, or codes is prohibited.

**File/Data Violations.** Deleting, examining, copying, or modifying files and/or data belonging to other users, without their permission is prohibited.

**System Interference/Alteration.** Deliberate attempts to exceed, evade or change resource quotas are prohibited. The deliberate causing of network congestion through mass consumption of system resources is prohibited.

## **Email and Communication Tools**

Email and other digital tools such as, but not limited to blogs and wikis, are tools used to communicate within the District. The use of these communication tools should be limited to instructional, school-related activities, or administrative needs. Students with District-issued email accounts should check email frequently, delete unwanted messages promptly, and stay within the email server space allocations. Email attachments are limited to 2MB or smaller. Internet access to personal email accounts is not allowed. Students should keep the following points in mind:

**Perceived Representation.** Using school-related email addresses, blogs, wikis, and other communication tools might cause some recipients or other readers of the email to assume that the student's comments represent the District or school, whether or not that was the student's intention.

**Privacy.** Email, blogs, wikis, and other communication within these tools should not be considered a private, personal form of communication. Private information, such as home addresses, phone numbers, last names, pictures, or email addresses, should not be divulged. To avoid disclosing email addresses that are protected, all email communications to multiple recipients should be sent using the blind carbon copy (bcc) feature.

**Inappropriate Language.** Using obscene, profane, lewd, vulgar, rude, inflammatory, threatening, or disrespectful language in emails blogs, wikis, or other communication tools is prohibited. Sending messages that could cause danger or disruption, personal attacks, including prejudicial or discriminatory attacks are prohibited.

**Political Lobbying.** Consistent with State ethics laws, District resources and equipment, including, but not limited to, emails, blogs, wikis, or other communication tools must not be used to conduct any political activities, including political advertising or lobbying. This includes using District email, blogs, wikis, or other communication tools to create, distribute, forward, or reply to messages, from either internal or external sources, which expressly or implicitly support or oppose a candidate for nomination or election to either a public office or

an office of a political party or support or oppose an officeholder, a political party, or a measure (a ballot proposition). These guidelines prohibit direct communications as well as the transmission or forwarding of emails, hyperlinks, or other external references within emails, blogs, or wikis regarding any political advertising.

**Forgery.** Forgery or attempted forgery of email messages is prohibited. Attempts to read, delete, copy or modify the email of other system users, deliberate interference with the ability of other system users to send/receive email, or the use of another person's user ID and/or password is prohibited.

**Junk Mail/Chain Letters.** Generally students should refrain from forwarding emails that do not relate to the educational purposes of the District. Chain letters or other emails intended for forwarding or distributing to others is prohibited. Creating, distributing or forwarding any annoying or unnecessary message to a large number of people (spamming) is also prohibited.

### **Student Email Accounts/Electronic Communication Tools (Grades 8-12)**

Communication and research skills are important for 21<sup>st</sup> Century students. Students in grades 8-12 will be provided with a Google Classroom Suite account that includes a school email account for school-related communication and/or research purposes only. Students will also be provided with access to homework and lessons through the District-approved Learning Management Systems, Google Classroom and/or Canvas. By having access to these tools, students are provided with an opportunity to learn and practice various 21<sup>st</sup> Century skills needed to prepare them for success in the future.

Access to a District student email account is included in the Google Suite account for students in grades 8 – 12. This account is set up with the student's user ID.

In grades 9-12, electronic communication tools are also available to students for collaboration purposes through the access provided in Canvas.

When using the electronic communication features of any District-provided tool, students must abide by the guidelines established in the Email and Communication Tools subsection of this document.

School email is monitored and filtered for appropriate use. Student email accounts will only be available for use by students in grades 8-12 while they are currently enrolled in the District. Parents of students in grades 8-12 wishing to deny access to District email must do so in writing to the campus principal and to the Director of Technology.

### **Google Classroom Suite Account Access (Grades 7-12)**

As appropriate, Google Classroom Suite accounts may also be granted to students for educational activities in grades K-7. This access provides the tools necessary to enrich their productivity, creativity and technology skills.

Student email addresses are generated but do not provide access to the email program for students in grades K-7. Instead, student email addresses in grades K-7 are used only to provide access to teacher-managed online course content in the District-approved Learning Management

System, Google Classroom Suite, or through a District-approved provider. This access is only to be used for academic purposes assigned by the teacher.

Although digital tools provided to students in grades 7-12 are not for the purpose of communication and the District takes every precaution to disable these features, temporary access to collaboration tools may be granted to fulfill academic purposes assigned by the teacher. When using the electronic communication features of any District-provided tool, students must abide by the guidelines established in the Email and Communication Tools subsection of this document.

## **Consequences of Agreement Violation**

Any attempt to violate the provisions of this agreement may result in revocation of the student's access to the computer/network/Internet, regardless of the success or failure of the attempt. In addition, school disciplinary and/or appropriate legal action may be taken.

**Denial, Revocation, or Suspension of Access Privileges.** With just cause, the System Administrator and/or building principal, may deny, revoke, or suspend computer/network/Internet access as required, pending an investigation.

## **Warning**

Sites accessible via the computer/network/Internet may contain material that is illegal, defamatory, inaccurate or controversial. The District network has filtering software that blocks access to visual depictions that are obscene, pornographic, inappropriate for students, or harmful to minors, as defined by the federal Children's Internet Protection Act. The District makes every effort to limit access to objectionable material; however, controlling all such materials on the computer/network/Internet is impossible, even with filtering in place. With global access to computers and people, a risk exists that students may access material that may not be of educational value in the school setting.

## **Disclaimer**

The District's system is provided on an "as is, as available" basis. The District does not make any warranties, whether expressed or implied, including, without limitation, those of merchantability and fitness for a particular purpose with respect to any services provided by the system and any information or software contained therein. The District does not guarantee that the functions or services performed by, or that the information or software contained on the system will meet the system user's requirements, or that the system will be uninterrupted or error free, or that defects will be corrected. Opinions, advice, services, and all other information expressed by system users, information providers, service providers, or other third-party individuals in the system are those of the providers and not the District. The District will cooperate fully with local, state, or federal officials in any investigation concerning or relating to misuse of the District's electronic communications system.
